

API Documentation

This booking API allows you to make bookings for a business within specific hours. Below you will find the instructions on how to interact with the API endpoint.

1. **Endpoint URL:**

The API endpoint URL for making bookings is:

```
POST /api/Settlement/MakeBooking
```

2. **Request Body:**

The request body should be in JSON format and include the following fields:

- **BookingTime:** The desired booking time in the format "hh:mm" (e.g., "10:30").
- **Name:** The name of the person making the booking in string format.

Example Request Body:

```
{  
  "BookingTime": "10:30",  
  "Name": "John Doe"  
}
```

3. **Response Format:**

If the booking is successful, the API will return a 200 OK status with a JSON response containing the BookingId.

Example Response Format:

```
{  
  "BookingId": "8c10a8b1-3d68-41d3-85f9-6216af54a6a9"  
}
```
